

KILLSWITCH RANKED

[Player and crew Elo ladders](#) · [naval + TDM](#) · [manual](#)

Ranked for naval and TDM. Win matches, climb the board, get a rank role. You get your own rank, your crew gets its own, and naval and TDM are separate boards.

HOW YOU RANK UP

Everyone starts at **1500**.

Who you played	Win	Lose
Even crew	+16	-16
Better crew	+24	-8
Worse crew	+8	-24

Beating a stacked crew is worth **3x** beating a weak one. No farming easy teams to climb.

First **10 games are placements** – you're hidden from the board until they're done.

THE RANKS

Rank	Rating
Legend	2200+
Marauder	2000
Corsair	1850
Buccaneer	1700
Privateer	1550
Sailor	1400
Deckhand	1250
Bilge Rat	under 1250

Updates itself. Don't like the names? Send us eight better ones.

EXTRAS

- **MVP votes** after every match – small rating bonus, and you can take it off a loss
- **Rank roles** in Discord that update themselves
- **Stats** – your rating history, crew vs crew all-time, and what's at stake before a match
- **Betting** with play money, totally separate from ranks (optional)

- **Website** – the board goes on the KILLSWITCH site next to Rust and CS2

Any of it can stay off if you want to keep it simple.

COMMANDS

Everything is a slash command – type `/` in any channel and Discord lists them with prompts, so you don't have to memorise anything.

ANYONE CAN USE THESE

No role needed.

Command	What it does
<code>/rank</code>	Your rating, rank, record, streak and a graph of your last 15 matches
<code>/rank player:@someone</code>	Look up anyone else
<code>/leaderboard mode:naval</code>	Top players. Add <code>board:Teams</code> for the crew ladder
<code>/h2h EVIL Kraken</code>	All-time record between two crews
<code>/odds naval EVIL Kraken</code>	What both sides stand to win or lose before they play
<code>/history</code>	Your last 10 matches and what each one cost or paid
<code>/match 12</code>	One match in full, including who reported it
<code>/mvp 12</code>	Who took MVP in a match, and the votes
<code>/teams</code>	Every registered crew
<code>/team EVIL</code>	One crew's roster and ratings

@REF – RECORDING RESULTS

The `@Ref` role unlocks exactly five commands. A ref can **record what happened** and nothing else.

Command	What it does
<code>/report</code>	Record a team result. Winning crew first.
<code>/report-pickup</code>	Record a match between unregistered sides
<code>/predict open</code>	Open betting on an upcoming match
<code>/predict close</code>	Stop betting early
<code>/predict resolve</code>	Settle a prediction by hand

A ref **cannot** delete a result, change a roster, set anyone's rating, reset the season, or give out the `@Ref` role. That is deliberate – see *Who can do what*.

STAFF – FIXING AND MANAGING

Anyone with the **admin role** or Discord's **Manage Server** permission. Staff can also use every ref command.

Command	What it does
<code>/void 12 reason:...</code>	Cancel a result. Every rating it touched is put back, including matches played afterwards
<code>/restore 12</code>	Undo a void
<code>/team-create</code> <code>/team-add</code> <code>/team-remove</code> <code>/team-disband</code>	Manage crews and rosters
<code>/rating-set</code>	Give a player or crew a starting rating – how existing MMR gets imported
<code>/season-new confirm:CONFIRM</code>	Start a fresh season. Ratings reset, history is kept
<code>/ranked-config</code>	Set the ref role, staff role and results channel; switch features on and off
<code>/ranked-setup</code>	Show what is still unconfigured
<code>/audit</code>	Who did what, with timestamps
<code>/tier-roles-sync</code>	Create the rank roles and assign them
<code>/recompute</code>	Rebuild every rating from the match log. Safe; diagnostic only

WHO CAN DO WHAT

Three levels. Each one can do everything the level above it can.

	Everyone	@Ref	Staff
See ranks, boards, stats	yes	yes	yes
Vote MVP in your own matches	yes	yes	yes
Record a match result	no	yes	yes
Open and settle betting	no	yes	yes
Cancel or restore a result	no	no	yes
Create crews, change rosters	no	no	yes
Set or import ratings	no	no	yes
Reset the season	no	no	yes
Change settings, grant @Ref	no	no	yes
Read the audit log	no	no	yes

Staff means the configured admin role, or anyone with Discord's **Manage Server** permission – so server owners always have access even if roles get deleted.

The split is on purpose: **a ref can write history, only staff can rewrite it**. Handing out `@Ref` is low risk. The worst a careless ref does is enter a wrong result, and `/void` erases it in one command – including its effect on every match played since. Every action by anyone is logged with their Discord ID, readable with `/audit`.

RECORDING A MATCH

For refs. One command per match.

```
/report mode:naval winner:EVIL loser:Kraken
```

Scores are optional (`score_winner` / `score_loser`). If substitutes played instead of the usual roster, pass `winner_players` or `loser_players` with @-mentions and the roster is ignored for that match.

The winning crew is named first, on purpose. There is no "who won?" box to mis-click – the order you type the crews *is* the result.

Got it wrong? `/void <id> reason:...`. Nothing is deleted and nothing needs recalculating by hand – every rating it touched goes back to exactly where it was, including matches played after the mistake. A void can itself be undone with `/restore`.

GOOD TO KNOW

The leaderboard looks empty at first. Players are hidden until they finish their 10 placement games. Add `show_placement:True` to see everyone. This is the single most common "is it broken?" question – it isn't.

MVP voting only works where the result was posted. The vote buttons live on the message the ref's command produced. Players need to be able to see that channel.

Rank roles need the bot ranked above them. If staff turn on automatic rank roles, the bot's own role has to sit **above** the rank roles in Server Settings → Roles, or Discord refuses to assign them.

Ratings can't be edited directly – only seeded. `/rating-set` sets where someone *starts*, then replays every match on top. That is why importing old MMR works even after matches have been played.

Naval and TDM are separate ladders, and individual and crew ratings are separate again. Being strong at one never quietly carries the other.
